\*California instructors require additional certification.

**E**MS Safety's Pediatric CPR and First Aid program emphasizes prevention and preparation for common medical emergencies involving infants and children.

The workbook contains everything taught in the basic CPR and First Aid course plus additional pediatric-specific information.

The program can be taught together as a CPR and first aid class or as separate courses. It is perfect for childcare environments.

*Attention California Instructors:* This program is approved by the California EMSA for instruction to licensed daycare centers, foster parents and school bus drivers.
